

# EDI Connect

Manufacturers

## Efficiency booster for the sales process

With EDI Connect, you, as a manufacturer, can automate the sales process to a huge degree. With this solution, nexmart receives orders from your retailers and forwards these to your ERP system in your preferred format. In the opposite direction, you send all order confirmations, dispatch notifications and invoices to us from your ERP system and we ensure that your retailers receive these documents. You can do all of this with just one interface – this really speeds thing up for you, reduces your workload and reduces your error rate.

### \* EDI Clearing

EDI Clearing provides the perfect enhancement. With this solution, we check and correct the content of orders before we send them to your ERP system.

## Features at a glance

- Automatically supply your ERP system with orders from retailers in your preferred format
- Forwarding of order confirmations, dispatch notifications and invoices to retailers
- Check and prepare the content of incoming orders

## Your benefits

- Your sales process is automated
- Your processing speed increases
- Your process efficiency is improved thanks to simple and fast integration in your preferred format
- Your error rate is reduced
- A single interface is all you need
- Subsequent clarifications are virtually a thing of the past
