

# EDI Connect

Retailers

## Your format – your transmission channel

With EDI Connect, you, as a retailer, can automate the purchasing process to a huge degree. You simply send your orders for manufacturers from your ERP system to nexmart. We then forward these to the relevant manufacturer. In response, we send all order confirmations, dispatch notifications and invoices from the manufacturer to your ERP system in your preferred format. We do all of this with just one interface.

### EDI Clearing

EDI Clearing provides the perfect enhancement. It allows us to check the content of messages in accordance with your specifications before we send them to your ERP system.

## Features at a glance

- Forward orders to the manufacturer
- Automatically transfer order confirmations, dispatch notifications and invoices to your ERP system in your preferred format
- Check the content of incoming order confirmations and invoices
- Send orders as an e-mail attachment

## Your benefits

- Your purchasing process is automated
- Your processing speed increases
- Optimized logistics and warehouse planning thanks to rapid delivery information from the manufacturer
- Your error rate declines
- You only need one interface to send orders to 300 manufacturers in the format of your choice
- Subsequent clarifications are virtually a thing of the past
- All orders and reply messages in the format of your choice
