

documents to EDI

Manufacturers

Faxes and emails for a higher EDI ratio

With documents to EDI, you, as a manufacturer, can take care of the further processing of orders from your retailers, thus ensuring even greater speed and efficiency. This works because documents to EDI can supply your ERP system with orders that retailers send you in mail, Word, Excel, PDF or TIF format. In addition, the content of all orders is checked before they are forwarded to your ERP system.

Features at a glance

- Convert all orders into one EDI format
- Complete check of all orders
- Make corrections to orders with errors using defined rules
- Send orders with errors to employees in prequalified form for further checking
- Forward converted, error-free purchase orders to the ERP system

Your benefits

- Your internal order processing becomes more efficient
- Your employees have more time for sales
- Your rate of complaints, number of returns and logistical costs decrease
- Original orders ensure full traceability
- Your EDI ratio increases
