

# online Market

Manufacturers

## Access to over 10,000 retailers

With online Market, you, as a manufacturer, can reach over 10,000 retailers from the B2B sector. In this way, you create a huge amount of visibility for your products and manage the entire sales process with ease – from order receipt to billing. You also make all product data available for retailers to simply transfer into their own systems. The same applies to sales-related master data. All with a minimum of effort on your part. All you need to do is send the information to nexmart via your nexmart interface. We take care of the rest. As a result, both your sales revenues and your process efficiency are boosted.

## Features at a glance

- Make your product offering available to over 10,000 retailers in the B2B sector
- Manage the complete sales process
- Make all product data available to retailers
- Make all sales-related master data available to retailers

## Your benefits

- Join the sector's B2B platform rather than setting up your own
- Raise your profile among retailers
- A cross-manufacturer product and price comparison is not possible
- Free support
- Manage and archive the complete order process
- Save time for your sales team
- Price and availability inquiries via your ERP connection (with ERP Connect / realtime Connect)
